COVER LETTER

MIRIAM MUNDAL OLESEN

-

Dear Nokia,

-

I'm applying for a full-time internship position at your company, specificly within your software development department. I am looking for a place where I will be able to use and improve my skills in C and/or C++, and your company seems like the perfect fit since you have a great interest in developers with those skills and abilities. The internship is intended to last approximately 6 months and I'm able to start as soon as possible.

I have studied at Hive Helsinki and taken part in various courses to polish my technical skills.
Due to the peer-to-peer learning environment in Hive, I have learned to take initiative of my own learning, by setting my own schedule and meeting deadlines. Teamwork becomes very important as you are reliant on the success of your peers in order to progress through the curriculum. Through project feedback I've developed my soft skills; how to give constructive criticism and compliment other people's work. I'm currently working on the Univeristy of Helsinki's *FullStack Open* course which focuses on modern JavaScript-based web development and I'm scheduled to finish by the end of the year.

My focus and drive for self development/learning means I'm always looking for courses/programs to improve my skillset. I'm not always going to have all the answers but what I bring is the adaptability and skills to find solutions in creative and newfound ways.

For further details upon my qualifications and experience please check out my attached CV as well as my github (github.com/Mundal1994) for insight into my projects.

If you have any questions feel free to contact me by mail (miriamolesen@outlook.dk) or by phone (040 328 3680). I look forward to hearing from you.

-

Best regards,
Miriam Mundal Olesen

PERSONAL DETAILS

Address: Punavuori, 00150 Helsinki
Phone: +358 40 328 3680
